

Climate Change Policy

The changing global climate will present risks to Hong Kong and other areas where the MTR Corporation operates. The Corporation is committed to adapting to and mitigating those risks by becoming one of the most resource efficient and ecologically sustainable railways and property service providers in the world.

The Corporation will:

- ◆ Assess risks and opportunities posed by climate change and implement actions to mitigate those risks.
- ◆ Reduce our direct carbon emissions in a targeted and continuous fashion.
- ◆ Actively influence our energy providers to address the climate change issues.
- ◆ Report on achievements annually.
