

About this year's cover

Building Connections Expanding Horizons

The growth of the Company's business continues to gather momentum in Hong Kong SAR, the Mainland of China and overseas, offering greater connectivity and building connections to new communities, and expanding the horizon of our customer reach worldwide with services that **care for their life journeys** and provide higher levels of convenience and reliability.

Through careful implementation of our growth strategy, our various new projects are transforming the Company's journey from being a local metro operator to an internationally recognised company with a much expanded local network and operations in major international cities such as Beijing and London.
