

MTR Listening · Responding Programme Brings New Look to Fo Tan Station Two Concourses Become One

Starting from tomorrow (12 December 2015), passengers can enjoy a more comfortable environment and convenient travel at Fo Tan Station where the two individual paid concourses have been merged to form one enlarged and integrated concourse. This will provide easier access to station facilities and all locations around Fo Tan Station for passengers. A large skylight above the enlarged concourse will also bring natural light into the station and reduce energy use.

This is the latest Station Improvement Project to be completed under the MTR Corporation's "Listening · Responding" programme launched in 2012. The Project aims to bring an even more convenient and comfortable travel experience to passengers by enhancing station environments and facilities.
