

New Escalators at Admiralty Station

Two newly installed escalators that connect different platform levels at MTR Admiralty Station will commence service tomorrow (Sunday, 29 December 2019). The escalators are part of the station expansion works for the Shatin to Central Link (SCL) Project.

Instead of transferring at Level 3, South Island Line passengers will be able to use the new escalators to enjoy a more direct and convenient connection from Level 5 to the Island Line/Tsuen Wan Line platforms on Level 2. Directional signage has been installed to guide passengers.

After the commissioning of the new escalators, the existing temporary escalator connecting Level 2 and Level 3 will be closed for demolition to facilitate the construction of the atrium and plant rooms of the Admiralty Station expansion. Hoardings will conceal construction activities from passengers to minimise any possible impact to station operations and passenger flow.

- End -

About MTR Corporation

Every day, MTR connects people and communities. As a recognised world-class operator of sustainable rail transport services, we are a leader in safety, reliability, customer service and efficiency.

MTR has extensive end-to-end railway expertise with more than 40 years of railway projects experience from design to planning and construction through to commissioning, maintenance and operations. Going beyond railway delivery and operation, MTR also creates and manages dynamic communities around its network through seamless integration of rail, commercial and property development.

With more than 40,000 dedicated staff*, MTR carries over 13 million passenger journeys worldwide every weekday in Hong Kong, the United Kingdom, Sweden, Australia and the Mainland of China. MTR strives to grow and connect communities for a better future.
