#### **East Rail Line Trains to Stop at New Platform Positions Starting from 19 February Paving the Way for the Installation of Automatic Platform Gates**

MTR Corporation announces today (14 February 2023) that preparation works for adjusting the train stopping positions for the East Rail Line (EAL) have been completed to prepare for the installation of platform gates. Starting from this Sunday (19 February 2023), the platform positions where passengers board and alight from the train will be the position of the platform gates in the future. A total of 25 platforms of the section from Lo Wu/ Lok Ma Chau to Mong Kok East stations will have new stopping positions, which will help minimise platform gaps, allow more even distribution of passengers on platforms and smoother flow of people. The other 10 platforms of the section will remain unchanged.

From this Sunday onward, passengers shall follow the grey platform signage for queueing. Reminders on the new arrangement will be disseminated by public announcements, station notices and on the passenger information display system at EAL stations. Additional manpower will also be deployed to assist passengers.

Installation of platform gates involves various procedures such as reinforcing the platform structure and altering the signaling system. Adjusting the train stopping positions is one of the crucial steps to ensure that the train stopping positions are accurately aligned with the platform gates.

The platform gates installation programme of EAL covers 35 platforms in 13 stations along the section from Lo Wu/ Lok Ma Chau to Mong Kok East stations. About 1,600 pairs of gates will be installed. Major advance works including the platform structure reinforcement works, implementation of the new signaling system and commissioning of new trains have been completed. Upon the opening of the EAL Cross-Harbour Extension, the Corporation then started the system testing and finetuning processes for the new stopping positions. All of these are important works to ensure that trains can stop accurately on the platform, and the platform gates can open and close smoothly. The Corporation will kick start the installation of platform gates at Racecourse and Tai Po Market stations in the next step as planned, then gradually proceed to other EAL stations.

-more-

“The MTR Corporation is devoted to providing an excellent travel experience for passengers and is working full steam on the installation of platform gates. As one of the essential preliminary works for the project, the implementation of the new train stopping positions will help minimise the platform gaps and bring a more even distribution of passengers, facilitating them to board and alight from trains smoothly,” said Ms Jeny Yeung, Hong Kong Transport Services Director of MTR Corporation.

Under the new arrangement, the existing queuing positions for the first and last cars, as well as that for the first class carriage will be relocated. Upon the implementation of new stopping positions, all platform signage will be changed from blue to grey, and the blue ones will be removed gradually. Installation works for platform-end barriers have been started ahead of time and are proceeding gradually at concerned stations along the EAL. The Corporation has also relocated the existing first-class processors and installed additional processors. There will be two processors at all first-class compartment queuing areas afterwards for passengers’ convenience.

-End-

## **New Train Stopping Positions**

<b>New Train Stopping Positions</b>	<b>No. of Platforms</b>
Mong Kok East Station (Platform 1 & 2) , Kowloon Tong Station (Platform 1), Tai Wai Station (Platform 1), Sha Tin Station (Platform 2, 3 & 4), Fo Tan Station, University Station, Tai Wo Station, Fanling Station, Sheung Shui Station, Lok Ma Chau Station & Lo Wu Station	25
<b>Train Stopping Positions Remain Unchanged</b>	
Mong Kok East Station (Platform 3), Kowloon Tong Station (Platform 2), Tai Wai Station (Platform 2), Sha Tin Station (Platform 1), Racecourse Station & Tai Po Market Station	10
