

Part A: System Requirement

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

TO BE FILLED BY THE SELLER				
Ref. No	Requirement	Pre-requisite (affirmative answer to question)	Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
1	General Requirement			
	Web-based System Requirement			
1.01	The Seller is required to offer a web-based order processing System to meet the Buyer's requirement specification as stated herein.			
1.02	Users should be able to access the Seller product catalogue on-line through internet.	1.01		
	Infrastructure			
1.03	The web-based ordering System should be operated under Microsoft Edge with internet firewall support. In addition, with and without proxy server support are also required.	1.01		
	Privacy & Security			
1.04	All data coming in and going out from the web site should be encrypted with Secure Socket Layer (SSL) standard to maintain its privacy and security.	1.03		
	Data Backup			
1.05	All transaction data should be kept at least 3 years on-line storage and 7 years off-line storage, for recovery and audit purpose.	1.01		
	System Performance	1.01		
1.06	The System should serve 24 hours a day and 7 days a week.			
1.07	Scheduled maintenance written notification should be sent to the Buyer at least 7 days in advance. Non-scheduled maintenance written notification should be sent to the Buyer immediately.			
1.08	The availability of the System must be at least 99.9% during the service hours.	1.06		
1.09	The System should not use more than 5 seconds to process and complete all kind of transactions and should not use more than 5 seconds to load and display catalogue items on a web page for User to shopping. In other words, the response time of the System should be fast.			
	Administration Function	1.01		
1.10	The System should allow MTR Administrator to perform the following functions. a) Define Product Catalogue Templates for Different User [refer to b) Set Up and Maintain of Master File [refer to section 3] c) Set Up and Maintain Company Profile, User Profile and Budget Control [refer to section 4]			
	System Function	1.01		
1.11	The System should allow Users to use the following basic functions. a) Login the System with Security Control [refer to section 5] b) User Modify His \ Her Own Profile [refer to section 6] c) Search and View Product Information [refer to section 7] d) Place Order with Budget Control and Stock Availability Enquiry [refer to section 8] e) Authorize Order through Pre-set Authorization Hierarchy [refer to section 9]			

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

		TO BE FILLED BY THE SELLER		
Ref. No	Requirement	Pre-requisite (affirmative answer to question)	Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
	f) Acknowledge Order [refer to section 10] g) Check Order Status and History [refer to section 11] h) Goods Return / Replacement [refer to section 12] i) Invoice, Credit Note and Monthly Statement (Off-line) [refer to section 13] j) Generate Management Report [refer to section 14] k) On-line Help, FAQ, Submit Question On-line and Contact Details			
	Electronic Document Interface			
1.12	Invoice and Credit Note processes are expected to be performed off-line. [For detail requirement, please refer to section 15 - Electronic Documents Transfer to the Buyer]			
	Product Catalogue			
1.13	At least the following key data are required in the System's on-line product catalogue. a) Part number b) Price c) Unit d) Description e) Category f) Type of Item (Contract / Non-Contract item) g) Photo or picture of item h) Packing unit i) Minimum order quantity	1.01		
1.14	If any contract item information e.g. price is updated, an updated file in Excel format is required to be sent to the Buyer. The information will be uploaded in a System on the Buyer's side for User to review the latest price and for verifying the invoice price. The Excel file should contain the following columns:- a) Category (e.g. stationery) as grouping header b) Part Number c) MTR Stock Code (for cross reference) d) Description e) Unit f) Price g) Remark h) Updated Date			
1.15	If a product item is changed from contract to non-contract, the Seller must refresh favourite list, saved shopping cart and etc. to ensure User should not be allowed to shop non-contract item if they are not eligible to shop it.			
	Support and Contact			
1.16	Call Center or Help Desk is required to provide hot line service from 9:00 a.m. to 5:00 p.m. daily from Monday to Friday.			
2	Define Product Catalogue Templates for Different User	1.10		

Part A: System Requirement

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

TO BE FILLED BY THE SELLER				
Ref. No	Requirement	Pre-requisite (affirmative answer to question)	Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
2.01	MTR Administrator should be able to define product catalogue templates in terms of product category.			
2.02	MTR Administrator should be able to create and maintain at least 5 product catalogue templates easily in the Seller's System through internet. A template can be assigned to individual User so that he can only purchase items specified in the template.	2.01		
3 Set Up and Maintain Master File				
3.01	MTR Administrator should be able to easily set up and maintain the following master files in the Seller's System through internet. a) Account Code b) Department Code, Name, Budget Limit Amount and User's Profile information for inherent c) Branch Code, Name, Budget Limit Amount and User's Profile information for inherent d) Ship to Address f) F1 Number (MTR reference number for budgeting) [Note: there is no need to setup work order number master file (MTR reference number for maintenance work order)]	1.10		
3.02	The Seller should perform the initial set up of the all the master files based on the contract agreement, such as uploading the contracted items with price, catalogue, account code, department code, branch code, ship to address, purchasing card information, F1 number and etc.	3.01		
3.03	For audit reason, the System should only allow disabling the master file information and not to physically delete it once it has been used and associated with transaction.	3.01		
4 Set Up and Maintain Company Profile, User Profile and Budget Control				
4.01	The Seller should perform the initial set up of the company profile and User profiles such as creating company profile and User profiles with information such as ship to address etc.	1.10		
4.02	The company profile, User profiles and their access right should be maintained by MTR Administrator very easy on-line using the Seller's System through internet.			
Company Profile				
4.03	The information and control in the company profile can be applied to the whole Corporation. For example, a control in the company profile indicates whether purchasing card can be used for payment or not.			
User Profile				
4.04	The System should allow MTR Administrator to maintain the following User profile information. a) Login Id and Name b) Password c) Branch Code d) Department Code e) Default Account Code			

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

Ref. No	Requirement	Pre-requisite (affirmative answer to question)	TO BE FILLED BY THE SELLER	
			Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
	<ul style="list-style-type: none"> f) A List of Account Code for Selection when placing order g) Default Ship-to-Address h) A List of Ship-to-Address for Selection when placing order i) MTR Email Address j) Single Order Limit k) Purchasing Card Number l) Product Catalogue Template m) Default Authorizer n) A List of Authorizer for Selection when placing an order amount over single order limit or budget limit o) Authorizer (Yes / No) who should be able to authorize order which has over single order limit or budget limit. p) Level Budget Limit Amount q) Allow or disallow placing order over single order limit r) Allow or disallow placing order over User, department or branch budget limit s) Department Budget Controller (Yes / No) – Only this User can authorize an order which exceeds the department budget limit. t) Branch Budget Controller (Yes / No) – Only this User can authorize an order which exceeds the branch budget limit. 			
4.05	User can modify his / her own User profile mainly the following <ul style="list-style-type: none"> a) Login Name b) Password c) Telephone Number d) MTR Email Address e) Shipping Comment 			
4.06	The System should have grouping features which can group User by Department Code and Branch Code. In other words, a User can be set up belong to one department and one branch. The relationship between branch and department is that one branch covers multiple departments.	3.01		
4.07	Grouping of User enables MTR Administrator to define access right for certain functions of the System by Department Code or Branch Code. Moreover, access controls and default values of individual User profile can inherent from department level and department level can inherent from branch level.	3.01		
4.08	The System should allow MTR Administrator to determine the access right of the following general functions for individual User or inherent access right from department level or branch level. <ul style="list-style-type: none"> a) View contract and / or non-contract items b) View budget status c) Authorize his own or other department's or branch's order d) Check order status of his own or other department's or branch's e) Return / Replace goods f) Select pre-defined account code(s) when placing an order g) Select pre-defined FI number(s) when placing an order h) Select pre-defined authorizer if an order amount is over single order limit or budget limit. i) Select pre-defined ship-to-address(s) j) Select payment method such as purchase card k) Run management reports of his own or other department's or l) Change password 			

Part A: System Requirement

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

TO BE FILLED BY THE SELLER				
Ref. No	Requirement	Pre-requisite (affirmative answer to question)	Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
4.09	Individual User profile can at least associated with one default account code. A list of unlimited account codes can be pre-defined for a User profile so that the User can select more than one account codes from the list and use them for the cost allocation of an order.	4.04		
4.10	A list of unlimited F1 numbers can be pre-defined for a User profile so that the User can select a F1 number from the list and use it for the cost allocation of an order.	4.04		
4.11	Individual User profile can at least associated with one default ship-to-address (i.e. delivery location). A list of unlimited ship-to-address can be pre-defined for a User profile so that the User can select a different ship-to-address from the list other than the default ship-to-address and assign it to an order.	4.04		
Budget Control				
4.12	The System should enable the MTR Administrator to set budget limit in monetary term at User level, department level and branch level. Such budget limit should be bounded by a certain period such as daily, weekly, monthly, yearly or specified.	3.01, 4.04		
4.13	The System should enable the MTR Administrator to set Single Order Limit in monetary term at User level.	4.04		
4.14	Usage of all the User, department and branch levels' budget should be recorded and cumulated so that the System should be able to check the next order total value again each level to see if it exceeds any budget limit.			
4.15	The System should check each order raised by an User against the pre-set Single Order Limit of the User and the budget limits at each level. If either one of these limits is exceeded, the order should be routed automatically to a pre-defined or a selected authorizer for authorization or the order is simply disallowed.	4.14		
4.16	The System should allow at least three authorization levels which means a User may have more than one authorizers. For example, User sends order to dept. head for review and approval and subsequently to cost controller for approval. A list of unlimited authorizers can be pre-defined for a User profile so that the User can select a different authorizer from the list other than the default authorizer and route the order to him for authorization.	4.15		
5 Login the Ordering System				
5.01	The System should have a secured access control mechanism such as pre-set User id and valid password are used to allow only authorized User to login.	1.11		
5.02	If a User logins the System with wrong password for more than five times consecutively, the User's account should be locked on a real-time basis. Only MTR Administrator can release the lock.	5.01		
5.03	The System should allow User to change his owned login password.	5.01

Ref. No	Requirement	Pre-requisite (affirmative answer to question)	Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
5.04	The System should provide Forget Password function which allows User to retrieve their login account password and send it back to User by email.			
6 User Modify His \ Her Own User Profile				
	User can modify his \ her own User profile. [Please refer to section 4 - Set Up and Maintain User Profile]	1.11		
7 Search and View Product Catalogue Information				
7.01	The System should allow to search and view product information on-line by entering searching parameters like brand, categories, manufacturer part no., or any key words.	1.11		
7.02	Stock on hand of a product should be displayed.			
7.03	The System should permit only pre-defined authorized User to view full catalogue or non-contract items according to the product catalogue template.			
7.04	To personalized a shopping list, the System should permit User to search and select items from catalogue or from previously invoice. This shopping list should easily be built after adding or deleting items as-and-when required.			
8 Place Order with Budget Control and Stock Availability Enquiry				
8.01	The System should enable placing orders in the following ways:- a) Select item(s) from online catalogue b) Select item(s) from the personalized shopping list c) Select item(s) from past invoices d) Refer to past invoices (by Invoice No.) e) Use product search f) Quote manufacturer part number	1.11		
8.02	Availability (i.e. stock on hand) of an item should be displayed and checked by the System automatically when User is placing an order. Warning should be displayed if an item is not available.			
8.03	The ordering information can be changed before the order is submitted to the Seller.			
8.04	The following information should be completed and confirmed before submitting an order. a) A cost allocation includes i) Account Code (mandatory), ii) F1 Number (optional) It is a MTR reference number for budgeting. It can be set available or not available for data input, currently, F1 number is available for data input and Work Order number is not available for data input. iii) Work Order Number (optional) It is a MTR reference number for maintenance work order. It can be set available or not available for data input, currently, F1 number is available for data input and Work Order number is not available for data input. iv) Allocated Percentage (optional)	4.04

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

Ref. No	Requirement	Pre-requisite (affirmative answer to question)	TO BE FILLED BY THE SELLER	
			Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
	<p>Multiple cost allocations can be input for the whole order. A list of account codes should appear for User's selection when inputting a cost allocation. If User does not specify one, the default account code should be used. A list of F1 numbers should also appear for User's selection when inputting a cost allocation.</p> <p>b) Ship to address – A list of ship-to-addresses should appear for User's selection. If User does not specify, the default ship-to-address should be used.</p> <p>c) Ship to contact person</p> <p>d) Preferred Delivery date</p> <p>e) Customized Reference Number – The System should allow User to customize a reference number for an order.</p> <p>f) Delivery Instruction - The System should allow User to add further delivery instruction for an order.</p>			
8.05	The System should allow User to enter shipment schedule for an order item. In other words, User can input a lump sum of order quantity and schedule partial delivery on different dates for an order item.			
8.06	<p>The following key data are required to store in an order because they are required to be copied to an invoice which will then be sent to the Buyer for the goods receiving process. Please refer to the <u>Appendix 1-C</u> for details.</p> <p>For header level,</p> <p>a) User's login id who placed the order</p> <p>b) Department code</p> <p>c) Branch code</p> <p>d) Email address of User who placed the order</p> <p>e) Multiple cost allocations</p> <p>For item level,</p> <p>a) Line number</p> <p>b) Part number</p> <p>c) Category</p> <p>d) Order Quantity</p> <p>e) Unit or Measure (UOM)</p> <p>f) Unit Price</p>			
8.07	<p>The System should automatically check whether or not an order is placed with amount exceeds the single order limit, User, department or branch level's budget limit. If it exceeds, authorization of the order will be required or simply disallow placing and submitting the order to the Seller.</p> <p>[For budget limit and authorization hierarchy set up details, please refer to section 4 – Set Up and Maintain Company Profile, User Profile and Budget Control.]</p>			
8.08	The System should allow User to save the "being prepared" order or shopping cart. The saved records can be retrieved later for modification i.e. add or remove item from the shopping cart before actually submitting them for approval.			

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

				TO BE FILLED BY THE SELLER	
Ref. No	Requirement	Pre-requisite (affirmative answer to question)	Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.	
8.09	The System should provide personalized shopping list (i.e. Favorites Item List) function which allows User to pick frequently order items from the list into a new order or shopping cart.				
9	Authorize Order through Pre-set Authorization Hierarchy	1.11			
9.01	The System should automatically route an order to a high level authorizer for authorization in accordance with the pre-defined authorization hierarchy or User selects a authorizer from a list of pre-set authorizers.	4.04			
9.02	The System should send e-mail to the chosen authorizer to inform an order requiring his / her authorization. The orders pending for authorization should be clearly displayed.				
9.03	If an order amount exceeds the single order limit or any level of budget limit, an alert message should be shown to the one who placed the order, the one who has not enough budget limit to authorize the order and the next level authorizer in the pre-defined hierarchy. This message should also explain the order amount exceeds which type of budget (i.e. single order limit, branch, department or User level's budget limit).	9.01			
9.04	If an order amount exceeds the department budget limit, only the Department Budget Controller can authorize it. If an order amount exceeds the branch budget limit, only the Branch Budget Controller can authorize it. Branch budget limit is always larger than the department budget limit since a branch covers many departments. [For budget limit and authorization hierarchy set up details, please refer to section 4 – Set Up and Maintain Company Profile, User Profile and Budget Control.]	4.04			
9.05	The authorizer can amend, approve or disapprove orders. The System should not allow submission of unauthorised orders.				
9.06	If authorizer rejects an order back to the order creator, the order creator can amend the order and re-submit it for approval again. Authorizer can input the amendment reason which let the order creator to understand why his order is amended.				
9.07	Authorizer can directly amend an order which is created by the order creator. Authorizer can input the reject reason which let the order creator to understand why his order is rejected. Once an order is submitted to authorizer for approval, the order cannot be amended by the order creator. The order can be amended by the order creator only if the order is still being prepared and not submitted to authorizer yet or the order is rejected by the authorizer back to him.				
10	Acknowledge Order	1.11			

Part A: System Requirement

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

TO BE FILLED BY THE SELLER				
Ref. No	Requirement	Pre-requisite (affirmative answer to question)	Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
10.01	The System should send e-mail to notify the one who placed the order which is authorized / updated / rejected/ being processed by Seller with details like PO number, ordered items, quantity, expected delivery and approval date.			
10.02	Ready to ship order notification to order creator			
11	Check Order Status and History	1.11		
11.01	Depending on the access right set by the MTR Administrator, User may only view his own orders' history, other Users' orders in the same department / branch or orders placed by other departments / branches.	4.08		
11.02	The System should enable searching of orders by the following information. a) The status of order such as waiting for authorization, reject authorization, authorized, partial shipment, exchange, cancelled, in delivery, shipped and paid. b) Order number of a specific order c) Order placed within a date range d) Invoice number of a specific order e) Customized Reference Number			
11.03	The search result should be a list of orders and the System should allow reviewing details of each order. The details should include the following information. a) Order status is - "Waiting for Authorization" - "Authorized" - "Rejected" - "Submitted" - "In Delivery" - "Partial Shipped" - "Shipped" - "Exchanged" - "Cancelled" - "Paid" b) Placed Order Date c) Placed Order By d) Authorized Date e) Authorized By f) Submitted Date g) Scheduled Delivery Date h) Ordered Quantity i) Shipped Quantity	11.02		
12	Goods Return / Replacement	1.11		
12.01	The System should allow online requesting exchange of defective or wrongly ordered items by submitting a goods return request record / exchange order to Seller.			
12.02	Once the goods return request record / exchange order is submitted, the System should acknowledge the one who raised the request by e-mail.	12.01		
12.03	The following key data are required to stored in a Goods Return Request record / Exchange Order.	12.01		

Part A: System Requirement

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

TO BE FILLED BY THE SELLER				
Ref. No	Requirement	Pre-requisite (affirmative answer to question)	Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
	a) Branch Code b) Return Number c) Invoice Number d) PO Number e) Return Type (e.g. Return or Exchange) f) Submitted By g) Submitted Date h) Processed Date i) Preferred Collection Date j) Item Number (Part Number) k) Item Description l) UOM m) Quantity to be Returned n) Return Reason			
12.04	The System should provide online report for the goods return request record / exchange order information and they can be saved in Excel file format. This Excel file is required uploading in a System on the Buyer's side so that goods return records can be traced and monitored regularly in the goods receiving process on the Buyer's side. [For report detail, please refer section 14 - the Generate Management Report]	12.03		
12.05	When User entering return request, User must be alerted that User may enter a repeated return request. This alert is a warning only and does not block user to submit the return request. For example, if user enter return request against the same invoice and the same line item, the system must alert user.	12.03		
13	Invoice and Credit Note (Off-line)	1.11		
13.01	To complete the e-procurement cycle, the Buyer is required to receive invoice and credit note in electronic format. [For the goods receiving process details, please refer to section 15 - Electronic Documents Transferring to the Buyer]			
13.02	The Buyer assumes that product item cannot be repeated in one invoice. In other words, the same product item cannot appear in more than one item lines of an invoice. If this assumption is violated, discrepancy will be found in the the Buyer's goods receiving system			
13.03	Thet Seller must validate the data correctness, completeness and consistency before sending them to the Buyer. Validation programs must be developed to check the following data before sending them to the Buyer.			
	a) Item category must be correct. e.g. It is not reasonable that all items fall in one category.			
	b) Invoice should not be sent without cost allocation which are cost centre , F1 number and allocation percentage			
	c) The same production item should not be found in more than one item lines of an invoice			

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

	d) Header information should possess item detail information and item detail information must possess header information.			
	e) The Seller must perform data reconciliation first before sending data to the Buyer. e.g. 10 invoices are found in the Seller's database for the month, 10 invoices should be sent to the Buyer for the month. There should be no missing document sending to the Buyer.			
	f) The Seller must develop good enough validation programs to ensure all data before sending to the Buyer are correct, complete and			
14 Generate Management Report				
		1.11		
14.01	The System should provide reports to help the MTR Administrator and User to monitor and regulate the corporation's purchase of office products. These reports should be generated on-line and printed by branch, department or account code in a specified period of time.			
14.02	Common User can view and generate reports, transactions and order status within and by his owned account code, branch code or department code.	14.01		
14.03	MTR Administrator can view and generate reports, transactions and order status of all account codes, branch codes or department codes.	14.01		
14.04	The System generated reports should be able to be downloaded in Excel spreadsheet format for further manipulation analysis by User themselves.	14.01		
14.05	The following basic reports are required. a) Monthly Consumption Summaries by specific Department, Branch or Account Code b) Monthly Consumption Summaries by Item c) Monthly Consumption Summaries by Categories d) Detail Monthly Invoice report by all or specific Department, Branch or Account Code e) Year-to-date Consumption report by specific Department, Branch or Account Code f) Contract List Report g) Delivery Performance report which is used to show the lead time compliance of the each order. h) Report on Goods Return Request Record / Exchange Order which should be sorted by Branch Code and selected for generation by date i) Report on Cancelled Order	14.01		
15 Electronic Documents Transferring to the Buyer				
		1.12		
	<p>Background of Existing e-Doc Transfer: Format: The interfaced data should be in XML or CSV file formats and will be encrypted in external suppliers' systems. The files are then transferred, decrypted and captured into Goods Receiving System (EGR) by batch jobs run under Control-M environment. XML/ CSV documents: Invoices and Credit Notes are required to be sent to the Buyer through EGR. Receiving Systems for EGR: EGR should receive the interface file(s) from the FTPs servers of external suppliers' systems. In order to streamline and complete the e-procurement cycle electronically, the Buyer also has an existing web-based System (EGR) to serve end-user doing the following tasks after receiving the XML/ CSV documents.</p> <ol style="list-style-type: none"> a) Let the Buyer's goods receivers to approve their e-Invoices with received quantity input. b) Let cost center heads to endorse the invoices/ credit notes which gives a signal to Finance Control Department to proceed making payment to e-Seller. c) Making use of the e-Documents to generate Oracle ADI spreadsheet for upload invoice in Oracle AP. 			

Part A: System Requirement

Definitions

1. "The System" means the order processing system provided by the Seller.
2. "MTR Administrator" means the staff member of MTR Corporation Limited ("The Buyer") nominated to administer the System in MTR Headquarters office through secured internet access.
3. "Users" means all staff members of the Buyer who are authorized to place order using the System in MTR's working places through secured internet access.

TO BE FILLED BY THE SELLER				
Ref. No	Requirement	Pre-requisite (affirmative answer to question)	Compliance to Requirement *(Yes / No)	Please elaborate in details if the System provided does not comply with the Buyer's Requirement. Please state whether enhancement will be developed or not. If enhancement will be developed, please state the development lead time required.
	d) Making use of the e-Documents to generate monthly reports for tracking those outstanding e-Invoices, e-Credit Notes and Goods Return.			
15.01	Basic Requirement for e-Data Transfer by Interface File			
	The Seller is required to generate interface files for Invoices, Credit Notes and Monthly Statements and send them to the Buyer at a pre-agreed period (e.g. weekly / bimonthly / monthly). The Buyer shall upload the received data on EGR. For the detail of the interface files, please refer to <u>Appendix 1-C</u> Interface file structure sheet)

SPECIFICATION FOR E-PROCUREMENT SOLUTION

Part B: Implementation, Maintenance and Support

Notes

1. Tenderer is required to specify detail implementation, maintenance and support plan below based on the following for technical requirements.
 - 1.1 Tender Award Date : Tentatively in mid Aug 2026
 - 1.2 Contract commencement with full implementation of eProcurement System and the integration with the MTRCL goods receiving system : 1 Nov 2026
 - 1.3 Number of existing users for the e-procurement system : 926 (as at Oct 2025)
 - 1.4 After the implementation and system go-live, the Employer's goods receiving to pay procedures including credit note issuing and goods
2. Tenderer may require attending tender interview or perform system demonstration upon request to show the technical competency and capability on eProcurement system and support.
3. Professional plan/program with detail elaboration will deserve higher scores in technical assessment.

Ref. No	Requirement	TO BE FILLED BY THE SELLER
16	IT Implementation	
16.01	Please provide a detail implementation plan based on the target implementation date on 1 Nov 2026. The plan should include all implementation tasks, time schedule, estimated man-power resource required from both yours & the Buyer etc.	
16.02	Please specify the size of your implementation team including program development designated for this Contract. Please provide the details of the team including their qualification, experience and year of services in your company.	
16.03	How many development / testing environments including the eProcurement System and e-Data Transfer (in XML or CSV file format) will you setup for this project? How do you perform program migration in these environments and how do you control the program version?	
16.04	Please provide functional specification for Appendix 1-A 13.03 since they are very important to the data integration between your ordering system and the goods receiving system.	
16.05	How do you ensure all your newly developed programs including the eProcurement System and e-Data Transfer can meet all the MTR's specifications? Do MTR need to involve in UAT especially for the data integration function which is custom made to MTR?	
16.06	Do you plan to maintain an implementation issue log and ensure all critical issues must be resolved before the whole e-procurement solution can be rollout to production?	
16.07	What document will you provide to User? In what kind of format? For what purpose, Training or Daily operation? Please list out the topics of this document.	
16.08	Please elaborate the training plan to show how you arrange training for such a large scale of User.	
16.09	As all the initial data setup must be done by you, how can you ensure that they can be done on time and the data are all setup correctly?	
16.10	Do you plan for a pre-implementation trial? If speed performance of the internet connection between the MTR network and your ordering system is not acceptable, how do you resolve this problem?	
17	IT Maintenance	
17.01	Please provide a detail maintenance plan which targets to resolve issues and maintain smooth operations after implementation. The plan should include issue reporting procedure, enhancement request procedure, yours man-power resource involved, program migration procedure, program version control (configuration management), regular IT related meeting schedule and etc.	

SPECIFICATION FOR E-PROCUREMENT SOLUTION

Part B: Implementation, Maintenance and Support

Notes

1. Tenderer is required to specify detail implementation, maintenance and support plan below based on the following for technical requirements.
 - 1.1 Tender Award Date : Tentatively in mid Aug 2026
 - 1.2 Contract commencement with full implementation of eProcurement System and the integration with the MTRCL goods receiving system : 1 Nov 2026
 - 1.3 Number of existing users for the e-procurement system : 926 (as at Oct 2025)
 - 1.4 After the implementation and system go-live, the Employer's goods receiving to pay procedures including credit note issuing and goods
2. Tenderer may require attending tender interview or perform system demonstration upon request to show the technical competency and capability on eProcurement system and support.
3. Professional plan/program with detail elaboration will deserve higher scores in technical assessment.

Ref. No	Requirement	TO BE FILLED BY THE SELLER
17.02	Please specify the size of your maintenance team including system enhancement and bugs fixing designated for this Contract. Please provide the details of the team including their qualification, experience and year of services in your company.	
17.03	How many development / testing environments including the eProcurement System and e-Data Transfer will you setup for maintenance? How do you perform program migration in these environments and how do you control the program version?	
17.04	What is the service level agreement (SLA) that you can provide for bug fixing and system enhancement?	
17.05	What is the procedure of User reporting system bug and raising system enhancement request? Please describe the complete cycle.	
17.06	What is the procedure of User reporting IT infrastructure issue ? e.g. internet connect very slow Please describe the complete cycle.	
17.07	Do you plan to maintain an after implementation issue log for monitoring all issues and resolutions found after implementation?	
17.08	Do you plan to provide statistics such as number of bug found, data integration failure and etc in order to monitor the system performance? The statistics will help to improve the system regularly.	
18 IT Support		
18.01	Please specify the size of your daily IT operation support team designated for this Contract. Would there is any dedicated hotline for IT support on the eProcurement System? Please provide the details of the team including their qualification, experience and year of services in your company.	
18.02	Regarding the e-data transfer, How can you ensure that the "DAILY" data sending to the goods receiving system are correct, complete and consistence?	
18.03	You are responsible to perform data reconciliation for the goods receiving as stated in the Specification. If discrepancy is found, what is the procedure of resolving the problem? Please list out the possible discrepancy cases for examples. 1) Missing invoices sending to the goods receiving system. 2) Sending incorrect item categories to the goods receiving system. 3) Missing invoice cost allocation sending to the goods receiving system. 4) Duplicated item lines found in one invoice and etc. It is expect you to provide data fix patch to fix the data in the goods receiving system	
18.04	What is the procedure of changing contract item to non-contract item and vice versa? How can you ensure all regular change of contracted items or prices are correctly updated in the System without error in prices, description, product category etc.?

 SPECIFICATION FOR E-PROCUREMENT SOLUTION

Part C - Interface file for e-Invoice and e-Credit Note

The followings are the three (3) interface files and their relationships

1	invoice_header.csv	Invoice header record
2	invoice_weight.csv	One invoice header record to many invoice cost center records
3	invoice_detail.csv	One invoice header record to many invoice item records

Format: The interfaced data should be in XML or CSV file formats and will be encrypted in external suppliers' systems. The files are then transferred, decrypted and captured into Goods Receiving System (EGR) by batch jobs run under Control-M environment.

Receiving Systems for EGR: EGR should receive the interface file(s) from the FTPs servers of external suppliers' systems.

Assumption: All kind of data such as description of the source system should not contain carriage return, line feed character or any special character which will distort the fixed column length text format

Front-End Cost Allocation Screen Entry for an Order:

The Buyer requests e-Seller to develop the following front-end screen format for User to enter cost allocation for an order. Multiple lines of cost allocations can be created for an order. F1 number and Work Order number are optional input. F1 number and Work Order number can be set available or not available for data input. Currently, F1 number is available for data input and Work Order number is not available for data input.

Cost Centre Code (50 chars)	F1 Number (8 chars)	Work Order Number (13 chars)
xxxxXxxxxXxxxxXxxxxXxxxxXxxxxXxxxxXxxxxX	xxxxXxxx	xxxxXxxxxXxxx
xxxxXxxxxXxxxxXxxxxXxxxxXxxxxXxxxxXxxxxX	xxxxXxxx	xxxxXxxxxXxxx
xxxxXxxxxXxxxxXxxxxXxxxxXxxxxXxxxxXxxxxX	xxxxXxxx	xxxxXxxxxXxxx
.		
xxxxXxxxxXxxxxXxxxxXxxxxXxxxxXxxxxXxxxxX	xxxxXxxx	xxxxXxxxxXxxx

Required fields:

Field Name	Type	Format	Maximum Length	Remarks
invoice_header.csv				
inv_num	Text		20	
inv_type	Text		3	"I" is for invoice and "C" is for credit note
issue_date	Datetime	dd/mm/yyyy	20

SUPPLIER REGISTRATION - SUPPLEMENTARY QUESTIONNAIRE
PROVISION OF OFFICE SUPPLIES THROUGH E-PROCUREMENT SOLUTION

APPENDIX 3 - SPECIFICATION OF TISSUE PRODUCTS

1. Scope of Supply

The Seller shall provide the following tissue products as per Specification attached herein.

- 1.1 2-ply and 3-ply Toilet Roll Tissue
- 1.2 2-ply Jumbo Roll Tissue with Dispenser
- 1.3 2-Ply Kitchen Paper Towel
- 1.4 1-Ply M-Fold Paper Hand Towel with Dispenser
- 1.5 1-Ply Centre-Pull Paper Hand Towel with Dispenser
- 1.6 1-Ply Jumbo Paper Hand Towel with Vida Sensor Dispenser
- 1.7 2-Ply Facial Tissue

2. General Specification for tissue products

All tissue products proposed shall be:-

- 2.1 Highly absorbent
- 2.2 White in colour
- 2.3 Generally free of foreign matters, stains, holes, abrasive materials, dusts and disagreeable odour
- 2.4 Soft with good hand-feel but does not disintegrate when used
- 2.5 Securely and individually wrapped with packing paper/plastic

3. General Requirement for Dispensers

- 3.1 All Dispensers shall be made of durable plastic that can resist impacts and with elegant outlook. Transparent front cover is preferable to allow convenient checking of paper supply
- 3.2 All dispensers proposed shall be approved by the Corporation.
- 3.3 All dispensers shall be provided at **free-on-loan basis. The Seller shall supply, deliver, install, replace, repair and dismantle the dispensers free of charge on an as-and-when-required basis.**
- 3.4 Additional dispensers may be required for replacement or new locations during the Contract Period. The Seller shall provide and install additional dispensers free of charge upon request.

SUPPLIER REGISTRATION - SUPPLEMENTARY QUESTIONNAIRE
PROVISION OF OFFICE SUPPLIES THROUGH E-PROCUREMENT SOLUTION

4. Laboratory Test Reports for Tissue Products

The Seller should submit along with this tender a laboratory report issued by an accredited standard testing laboratory on bacteria tests taken within the last six months including but not limited to :

- Aerobic bacteria count
- Coliforms
- Hemolytic streptococcus
- Staphylococcus aureus

The test results should meet the National Hygienic Standard for bathroom tissue (including bathroom tissue base paper) GB 20810-2018 or GB15979-2024

5. Particular Specification for tissue products

The Seller is required to propose alternative tissues in accordance with the Specification attached herein. **If the proposed alternatives do not comply with our requirements, the Seller shall offer the original brand and model as specified in Annex.**
